# AIRKRAFT

## ABOUT US

Since its establishment in year 2000, Aircraft continues to add-on its quality and productivity. With approximately 80% of products exported, Aircraft is now a well known and well respected brand in more than 70 countries worldwide.

Choice of both OE companies and reputable aftermarket shelves, Aircraft guarantees its processes and customer satisfaction by ISO TS 16949.

In order to provide sustainable quality and competitiveness at the same time, Aircraft speeded up investments with SAP implementation and its own Calendar Line.

Both already completed, investments will improve organizational abilities, raw material security and maneuverability.

Striving for the better product and the better service, Aircraft will not stop looking for ideas and solutions.

## CONVOLUTED AIRSPRINGS

Classified as single, double and triple, convoluted airsprings increasingly replace pneumatic cylinders in the world industry.

With higher course length, compactness, ease of usage and low maintenance costs, convoluted air springs offer the performance in lifting, compression, suspension and eliminating vibration both under vehicles and machines.

As well as aftermarket customers, Aircraft proudly provides high quality convoluted airsprings to local OEM brands since year 2000.

## CABIN AIRSPRINGS

Used in the truck and tractors' cabin as four point suspension, the cabin airsprings provide much more comfort in comparison to its preceeeders, steel springs. Combining traditional shock absorbers with air springs instead of coil springs, this hybrid solution to suspension significantly eliminates vibration.

Since 2000, Aircraft supplies cabin airsprings and sole sleeves to leading European shock absorber producers.

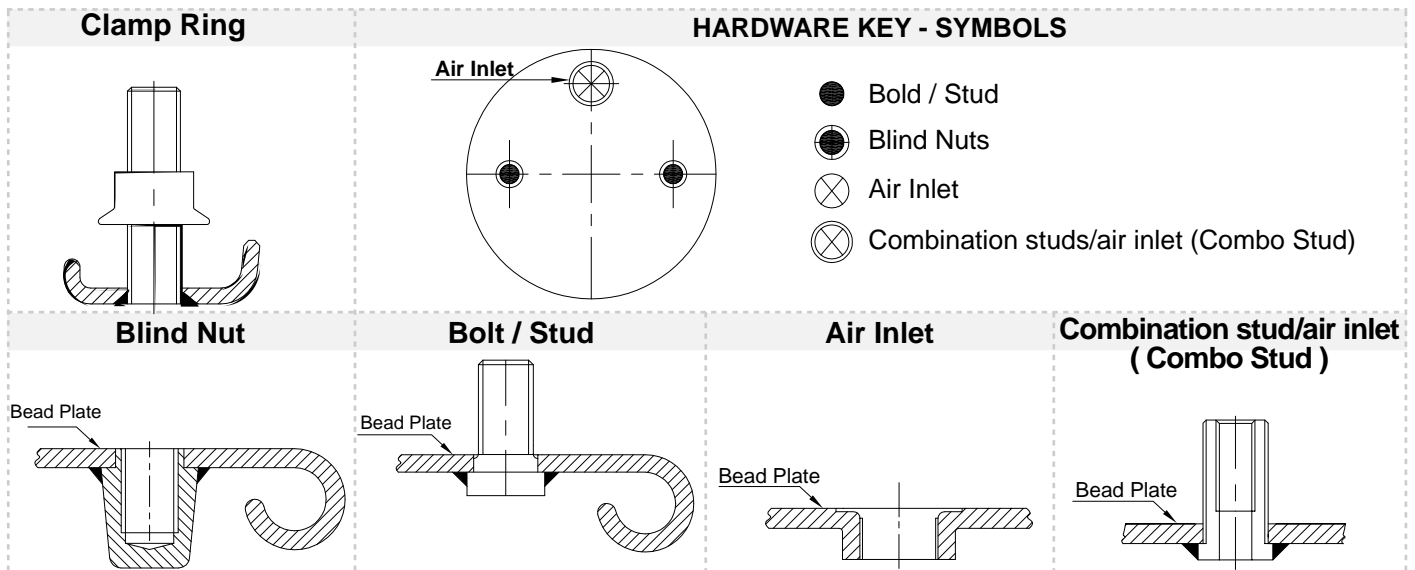

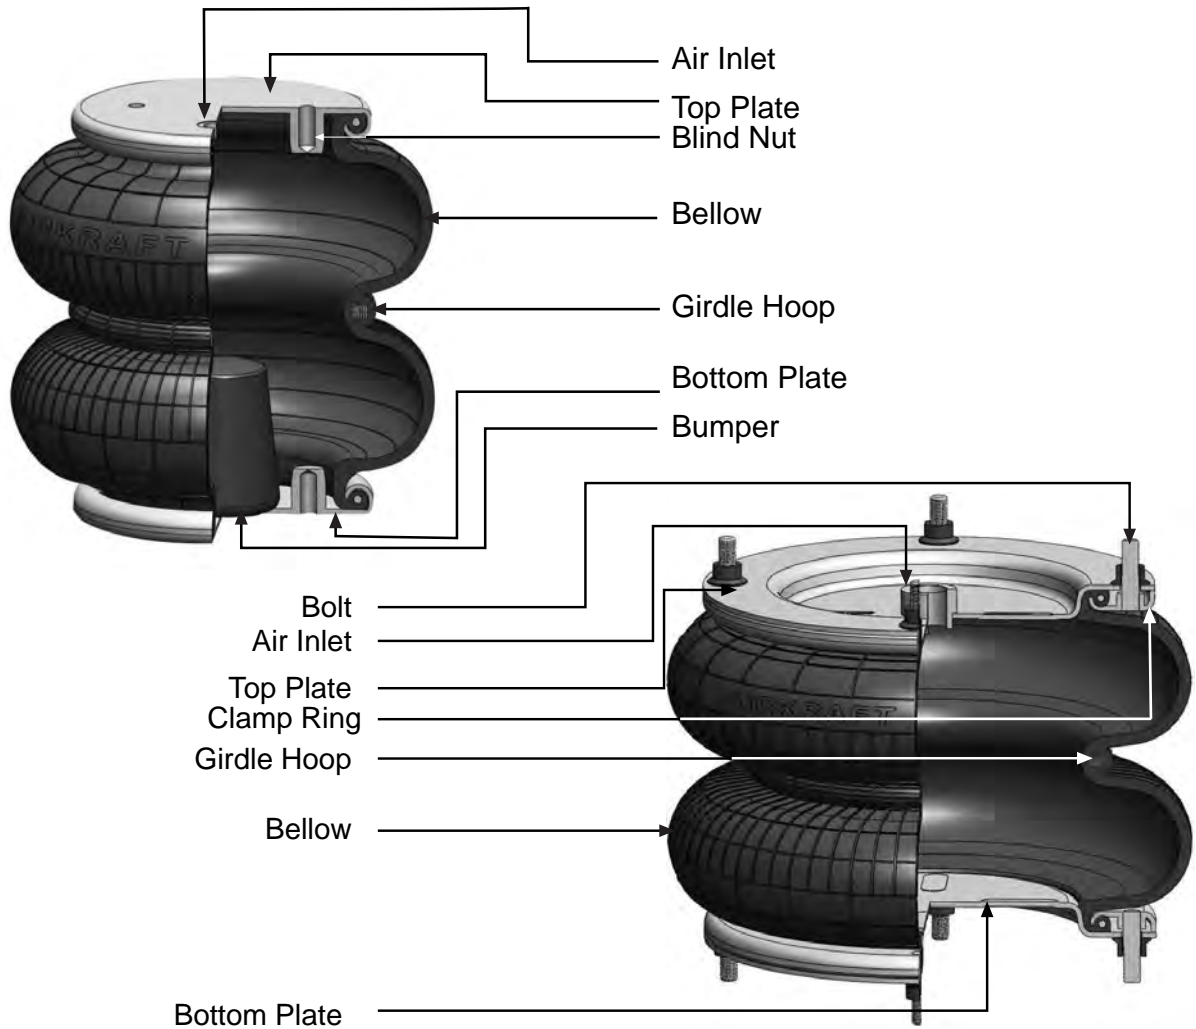

## SEAT AIRSPRINGS

Drivers' seat air springs provide a new breed of seat suspension, lowering fatigue, and health risks frequently faced by drivers. Eliminates the vibration for the most important part of the truck, the driver, and keeps the seat at an adjustable height at all times.

Besides supplying the aftermarket, Aircraft also supplies leading global seat producers.

## PRODUCT ID AND TRACEABILITY

### BARCODE

Barcoding system provides AIRKRAFT products a maximum traceability down to the raw material. Via the barcode number on the label, it is possible to answer all questions regarding the product, until the final customer.
