NEVKA
COMPOSITE
HOUSE

Nevka Composite House has met SMC (Sheet Moulding Compound) technology, which has already been in practice, especially in the automotive sector quite frequently for many years, with economic and practical living environments. The main purpose of the Nevka Composite House whether for individual or professional use, is to offer high quality, long-life, healthier solutions at various whether conditions as standard. Nevka Composite House solutions, can be either applied at urban regeneration projects or at labor camps required during mall or other construction projects of large scale, or when required by enhancing bullet proof specification of the material, can also respond to the security requirements, and provide fast, as well as aesthetical and durable solutions with compact bathroom units and doors of the product range for all types of interior renovation.

The common characteristics of Nevka Composite House is to offer, compared to other type of structures, higher resistance to the large scale earthquakes, thanks to its lighter and flexible structure with no need to the steel and concrete components. Nevka Composite House solutions enable also heat and sound insulation, as well as fire proof thanks to polyisocyanate fill material.

Modular system, besides highest safety standards and ease of assembly, offers also the possibility to renew or enlarge the living environment through additional parts and units. Panels do not require any point, since they are coated with UV protection, but also meet the customers with more enjoyable living environments thanks to its self-patterned design.
