MERITOR™

Meritor Self Steering Axles

Meritor has been promoting the use of steering axles for many years, particularly for maximum length tri-axle trailers which must meet turning circle requirements.

Meritor self-steer axles give tri-axle stability, reduced tyre wear, increased manoeuvrability and have maximum interchangeability with Meritor fixed axles.

MERITOR™

Meritor Brakes – Associated Items

As the leading supplier of automatic slack adjusters and foundation brakes in North America, Meritor understands their delicate relationship. In today's competitive climate, successful businesses need to reduce costs and increase

productivity. The Meritor ASA, proven in hundreds of billions of service miles, will help you achieve these goals.

Meritor spring brakes, in addition to providing a means of applying the trailer Service brake, provide a SAFE and RELIABLE trailer Parking brake.

MERITOR™

Meritor Trailer Suspensions

There are many air suspension systems on the market. Meritor offers two ranges - Flexair and Indair. Flexair retains the traditional beam axle while Indair offers fully independent wheel

stations and is the most advanced system currently available.

Meritor's SMT Suspension is one of the lightest and simplest mechanical suspensions available today.
