

Safe **Braking** Products

# PRODUCT CATALOGUE

Safe **braking** is our priority

[www.sbp-brakes.com](http://www.sbp-brakes.com)

## OUR AIMS ARE:

- delivering top quality and at the same time safe spare parts for braking systems of commercial vehicles
- strict control during each stage of production in order to assure top quality for all delivered products
- constant development of product range in order to meet the requirements of market and customers
- searching for new production technologies in order to increase durability of products and at the same time being able to keep competitive prices
- being a leading supplier of brake system spare parts for aftermarket

---

Such mission of our company allows us to focus on what is most important for our Customers, and at the same time for us. Our experience so far, shows that we are going the right way. Our presence and constant growth of market share in Central and Eastern Europe are not only motivating to constant development and hard work, but also lets us having an optimistic look into the future.

---

**SBP PRODUCTS** are a subject to strict control and tests during all stages of production: beginning with purchasing raw materials from trusted suppliers, who can guarantee top quality of materials, through all production processes, finishing with packing final goods. The production is performed in compliance with rigorous quality standards, which are all described and kept by ISO/TS 16941 norms.

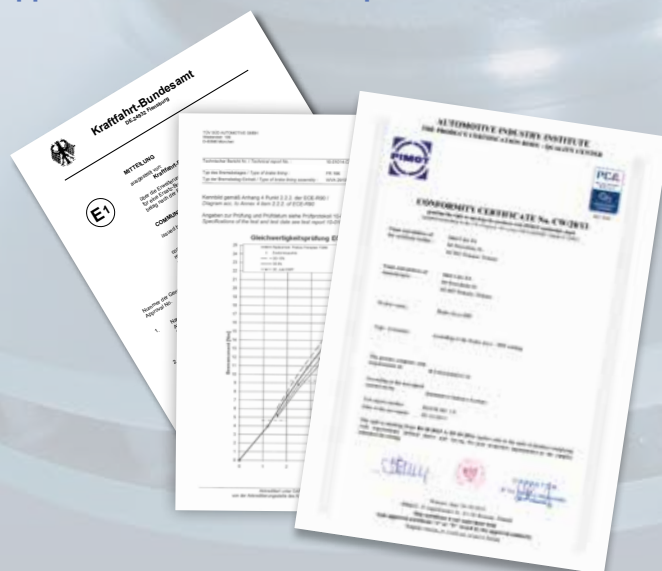

Quality tests are made in three areas, thanks to this our products meet all the toughest quality norms and standards.

We begin with precise geometry measurements of supplied elements. Thanks to special measuring devices we can obtain accuracy of measurements up to 0.002mm.

Another step is metallographic tests which we begin with checking the hardness of material and we compare it with strict norms.

The last stage of quality control tests is analysis of microstructure. This test allows us to check the kind of material being used for production. We compare many elements of microstructure with the data in norms, these are mostly graphite grains check of the material and also elements of matrix.

**Our high quality has been confirmed by the approval of E11 for brake pads and a certificate of conformity for the brake discs.**
